Redmond 2000R Series Pump

Redmond Environmental progressing cavity grinder pump is a core replacement for the E/ONE® 200, 2000 and Extreme series pump basin with no modification required.

The Redmond 2000R Series Grinder Pump is a custom designed grinder pump, check valve, and anti-siphon valve.

Units are available for indoor and outdoor installations.

Motor: 1 HP, 1725 RPMs, capacitor start, redundant thermal protection, single phase, 120V or 240V, 60 hertz

Discharge comes in a variety of configurations:
1-1 /4" stainless steel pipe with female thread (indoor) end that can easily be adapted to PVC pipe or any other material required by local codes.

1-1 /4" stainless steel "candy cane" with three lobe discharge grommet

Electric Quick Disconnect with six pin male insert in a gray rectangular or black round housing.

E/ONE® is a registered trademark of Environment One
